PROFILE

I am a passionate Fullstack Web Developer with experience in building efficient and user-friendly web applications. I have a strong foundation in software development, complemented by hands-on expertise in modern frameworks and technologies. My goal is to contribute to innovative projects, solve complex technical challenges, and continuously grow as a professional in the tech industry.

EDUCATION

Bachelor's Degree in Computer Systems Engineering

Aug. 2017 – Jun. 2022

Technological Institute of Oaxaca

Oaxaca, Mexico

- Developed a solid foundation in software engineering principles, algorithms, and programming.
- Completed a capstone project involving a web system using Django and neural networks.
- Acquired practical skills in database management, web development, and system design.

English Language Training (Advanced Level - B2)

Sep. 2023 – Current

Harmon Hall

Oaxaca de Juarez, Mexico

- Successfully completed an advanced English program aligned with international standards such as TOEFL® ITP, TOEIC®, and Michigan ECCE.
- Developed advanced skills in speaking, listening, reading, and writing, enabling fluent communication in professional and social contexts.
- Focused on improving pronunciation, grammar, and vocabulary for effective and confident communication.

EXPERIENCE

Junior Frontend Developer

Feb. 2024 – Sep. 2024

CBI Multiassets

Oaxaca de Juarez, Mexico

- Developed responsive web interfaces using React.js.
- Collaborated with teams to implement client requirements.
- Optimized front-end performance and user interactions.
- Integrated RESTful APIs for seamless data flow.
- Conducted code reviews to maintain clean codebases.

IT Support Specialist

Jul. 2023 – Jan. 2024

CBI Multiassets

Oaxaca de Juarez, Mexico

- Provided technical support for hardware and software issues.
- Maintained and configured technological equipment.
- Resolved IT incidents promptly with high-quality service.
- Documented incidents and solutions for future optimization.

Web Developer Intern

Aug. 2022 – Mar. 2023

Technological Institute of Oaxaca

Oaxaca, Mexico

- Designed and developed a web system using Django.
- Implemented a neural network for decision-making processes.
- Collaborated with faculty to gather and implement requirements.
- Documented and delivered a comprehensive project report.

SKILLS

Technical: Web Development (Frontend Backend), React.js, Django Framework, PostgreSQL, IT Support, RESTful APIs, Version Control (Git/GitHub), Responsive Design

Languages: English (Advanced - B2), Spanish (Native)

INTERESTS

Web development, software design, technological innovation, continuous learning in programming and IT, reading about emerging technologies, and maintaining a healthy and active lifestyle.

CERTIFICATIONS

JavaScript Advanced Course

Udemy

May 2023

React.js Complete Guide

Coursera

Jul. 2023
